

## PRESENTATIONS

**Note:** All of Dan's speeches can be customized. He works with you to understand your audience, your theme, and your goals for the presentation. The following titles and concepts can be mixed or matched to create the most exciting program for your audience.

### **Keynote:**

#### **Connecting the Dots in a World of Uncertainty**

Global and domestic economic cycles and financial, commodity, and currency market trends are constantly present regardless of what's heard in the media. Understanding global market cycles and what we can learn from their behavior is the first step for success. Trends in global economies and markets have a direct affect to your bottom line whether you are an investor, trader, advisor, business owner or student. Best to align with natural cycles. Fall of ancient civilizations can tell us quite a bit about our current modern economic and political societies. Presentation includes historical and up to date global and domestic economic and financial charts which are put into context as to current economic and financial cycles. Historical charts and graphs help visualize where the global and domestic economies have been along with financial, commodity and currency markets, and where they may be heading.
